## DETAILED ACTION

Applicant's amendment of 7-21-06 has been fully considered. The amendment has overcome the previous rejections of 112/1<sup>st</sup> and 2<sup>nd</sup> paragraphs. However, in view of the extensive subject matter covered by formula I, the following restriction is deemed necessary.

### *Lack of Unity*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group 1**, claim(s) 1, 2, and 14-16, drawn to compounds of formula (I) wherein B is B<sub>1</sub>(B<sub>1</sub>')-B<sub>2</sub>(B<sub>2</sub>')-B<sub>3</sub>(B<sub>3</sub>')-B<sub>4</sub>(B<sub>4</sub>

**Group 2**, claim(s) 1-7, 9, 10, and 14-17, drawn to compounds of formula (I) wherein B is B<sub>1</sub>(B<sub>1</sub>')-B<sub>2</sub>(B<sub>2</sub>')-B<sub>3</sub>(B<sub>3</sub>')-B<sub>4</sub>(B<sub>4</sub>')-B<sub>5</sub>(B<sub>5</sub>

**Group 3**, claim(s) 1, 2, 8, 14-16 and 18, drawn to compounds of formula (I) wherein B is B<sub>1</sub>(B<sub>1</sub>')-B<sub>2</sub>(B<sub>2</sub>')-B<sub>3</sub>(B<sub>3</sub>')-B<sub>4</sub>(B<sub>4</sub>')-B<sub>5</sub>(B<sub>5</sub>')-B<sub>6</sub>(B<sub>6</sub>

**Group 4**, claim(s) 1, 2 and 11-16, drawn to compounds of formula (I) wherein B is as recited in claim 11, pharmaceutical composition thereof, and method of inhibiting Cdk using said compounds. Further restriction is required if this group is elected.

Inventions of Groups 1-4 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct from each other by variable B.

The inventions of Groups 1-4 have a common core of *quinoxalinone*, which does not sufficiently define the invention, and is not a contribution to the art. It is the combination of variable B, the benzo fused 5-membered ring, and the quinoxalinone that gives compounds of each group their unique physical, chemical properties and biological activities. Depending on what they represent, the claimed formula would have different structure. Thus, a reference anticipated or rendered obvious compounds of one group would not do so to those of other groups. Therefore, a separate search is required for each group.

Note, variable B constitutes different ring sizes for formula I, and makes formula I an improper Markush group.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required. Also, because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Under 35 U.S.C. 372(b)(2), "international applications designating but not originating in, the United States...the Commissioner may cause the question of unity of invention to be reexamined under section 121 of this title..." Thus, as discussed above, the instant invention

Art Unit: 1624

clearly lacks unity according to PCT 13.2. Accordingly, restriction under 35 U.S.C. 121 and 372 is deemed necessary.

Due to the complicated structure of B and formula I, the restriction is presented in writing. Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
